## HEAD ROPES

The color code is in front of the name tag.

### Head Ropes

1	<b>Super Soft</b>	The #1 Super Soft is the softest rope we make. This rope has the most tip weight of any rope on the market. This is the rope we like to see novice ropers start with because it is so easy to swing. It is also used by some top-notch ropers who like a soft rope with lots of body.
2	<b>Extra Soft</b>	The #2 Extra Soft is our most popular rope. It's used by everyone from the novice to the professional roper. This rope works great on all types of cattle. The #2 Extra Soft has traditionally been the softest rope, but we developed the #1 SS for ropers that like an even softer rope.
3	<b>Soft</b>	The #3 Soft, our second most popular head rope, is a favorite of ropers with experience and rope handling ability. It has enough stiffness to be swung and thrown harder without the loop closing.
4	<b>Medium Soft</b>	The #4 Medium Soft rope was developed for the most experienced headers. Its stiffness requires more skill to deliver and it has enough body to use as a softer heel rope.
