## HEEL ROPES

The color code is in back of the name tag.

### Heel Ropes

1

#### Medium Soft

The #1 Medium Soft heel rope is perfect for ropers who don't use a lot of power in their delivery. This is a great rope for the novice heeler.

2

#### Medium

The #2 Medium is our most popular heel rope. It can be used with a wide variety of roping styles. It has enough tip weight for easy swinging, but also enough stiffness to stand up when thrown in front of the feet.

3

#### Hard Medium

The #3 Hard Medium rope was designed for the ropers that thought the Heel #2 was too soft and the Heel #4 was too hard. This rope takes more skill to swing and place than the #2. This rope is perfect for the advanced heeler.

4

#### Medium Hard

The #4 Medium Hard rope has enough stiffness to stay open and catch. Even with this much stiffness, this rope has the body to keep it from being wiry or bouncy. This rope is used mostly by top-notch heelers.
